

# Digital technologies: Transforming how healthcare is delivered to citizens

## Digital Health Partnering Event, Bristol, 13 February, 2018

This event will look at how technologies such as AI, VR, wearables, apps, sensors and IoT are reshaping and changing the healthcare landscape.

This event is aimed at digital, healthcare and informatics companies developing clinically orientated healthcare solutions and health and social care professionals.

### Extend your knowledge

Hear from leading healthcare innovators and experts on how digital technology is being used globally to improve health & wellness.

### Create opportunities

Pitch to others, showcase your solutions and network with like-minded innovators.

### Build your international network

Meet experts, professionals and businesses from around the world in pre arranged 1-2-1 meetings.

### Focus

1. Prevention, health and wellbeing
2. Diagnosis and treatment
3. Self management and care
